PROJECTS

Personal Projects (CCNA)

Home Network Setup

- Set up a home network with Cisco routers and switches, configuring services like DHCP, NAT, and VLANs. Added security measures using access control lists (ACLs).

Network Troubleshooting Lab

- Created a lab to simulate network issues such as connectivity problems and routing errors. Practiced troubleshooting and problem-solving to fix these issues.

Router and Switch Security

- Secured network devices by disabling unnecessary services, setting strong passwords, and enabling secure remote access via SSH.

Personal Projects (Video Editing)

Video Editing

- Created a collection of video projects including social media content. Focused on editing, colour grading, and adding effects to enhance the videos.

Social Media Content Creation

- Produced videos for social media, including short-form content and reels. Applied editing techniques like trimming, transitions, and audio enhancements for better engagement.

Promotional Ad Production

- Designed and edited promotional videos for boosting, focusing on public engagement.
